BUILT FOR

Main contractors
Developers and industrial clients
Rail and infrastructure supply chains

Defined civil-work packages, delivered locally

A practical site partner for scopes that require coordinated people, equipment, materials and documentation.

Reinforced concrete

- Formwork and reinforcement
- Foundations, slabs, walls and in-situ structures
- Concrete placement, vibration and finishing
- Coordination with concrete supply and pumping

Roads and asphalt

- Excavation, subgrade and aggregate bases
- Asphalt surfacing and reinstatement
- Kerbs, paving and pedestrian areas
- Interfaces with signs, markings and drainage

Utilities and earthworks

- Stormwater, drainage and external pipelines
- Chambers, cable sleeves and service crossings
- Trenching, backfill and compaction
- Surface reinstatement and landscaping interfaces

Industrial external works

- Yards, access roads and hardstanding
- Parking and pedestrian infrastructure
- Combined concrete, road and utility packages
- Work in active industrial environments

HOW WE ENGAGE

1

Send the drawings / BOQ

Add project location, programme and required work package.

2

Clarify responsibility

Materials, equipment, interfaces, quality records and site conditions.

3

Receive our proposal

Defined scope, exclusions, pricing basis and delivery plan.

Relevant work, documented on our website

LITHUANIA

Industrial concrete works

Formwork, reinforcement and concrete placement for industrial infrastructure, including foundations and linear reinforced-concrete elements.

IECAVA AREA

Industrial yard and access

Bearing base, asphalt surfacing, paving and kerbs, together with drainage repair and external-area reinstatement.

MADONA

Urban road infrastructure

Carriageway and pedestrian areas, kerbs, water and sewer interfaces, stormwater drainage, lighting and road-marking coordination.

Send us a defined work package

Drawings / BOQ · project location · programme · requested scope
